Topiary Berlin: Small crafts  
business goes online

Ironhack  
UX/UI  
App

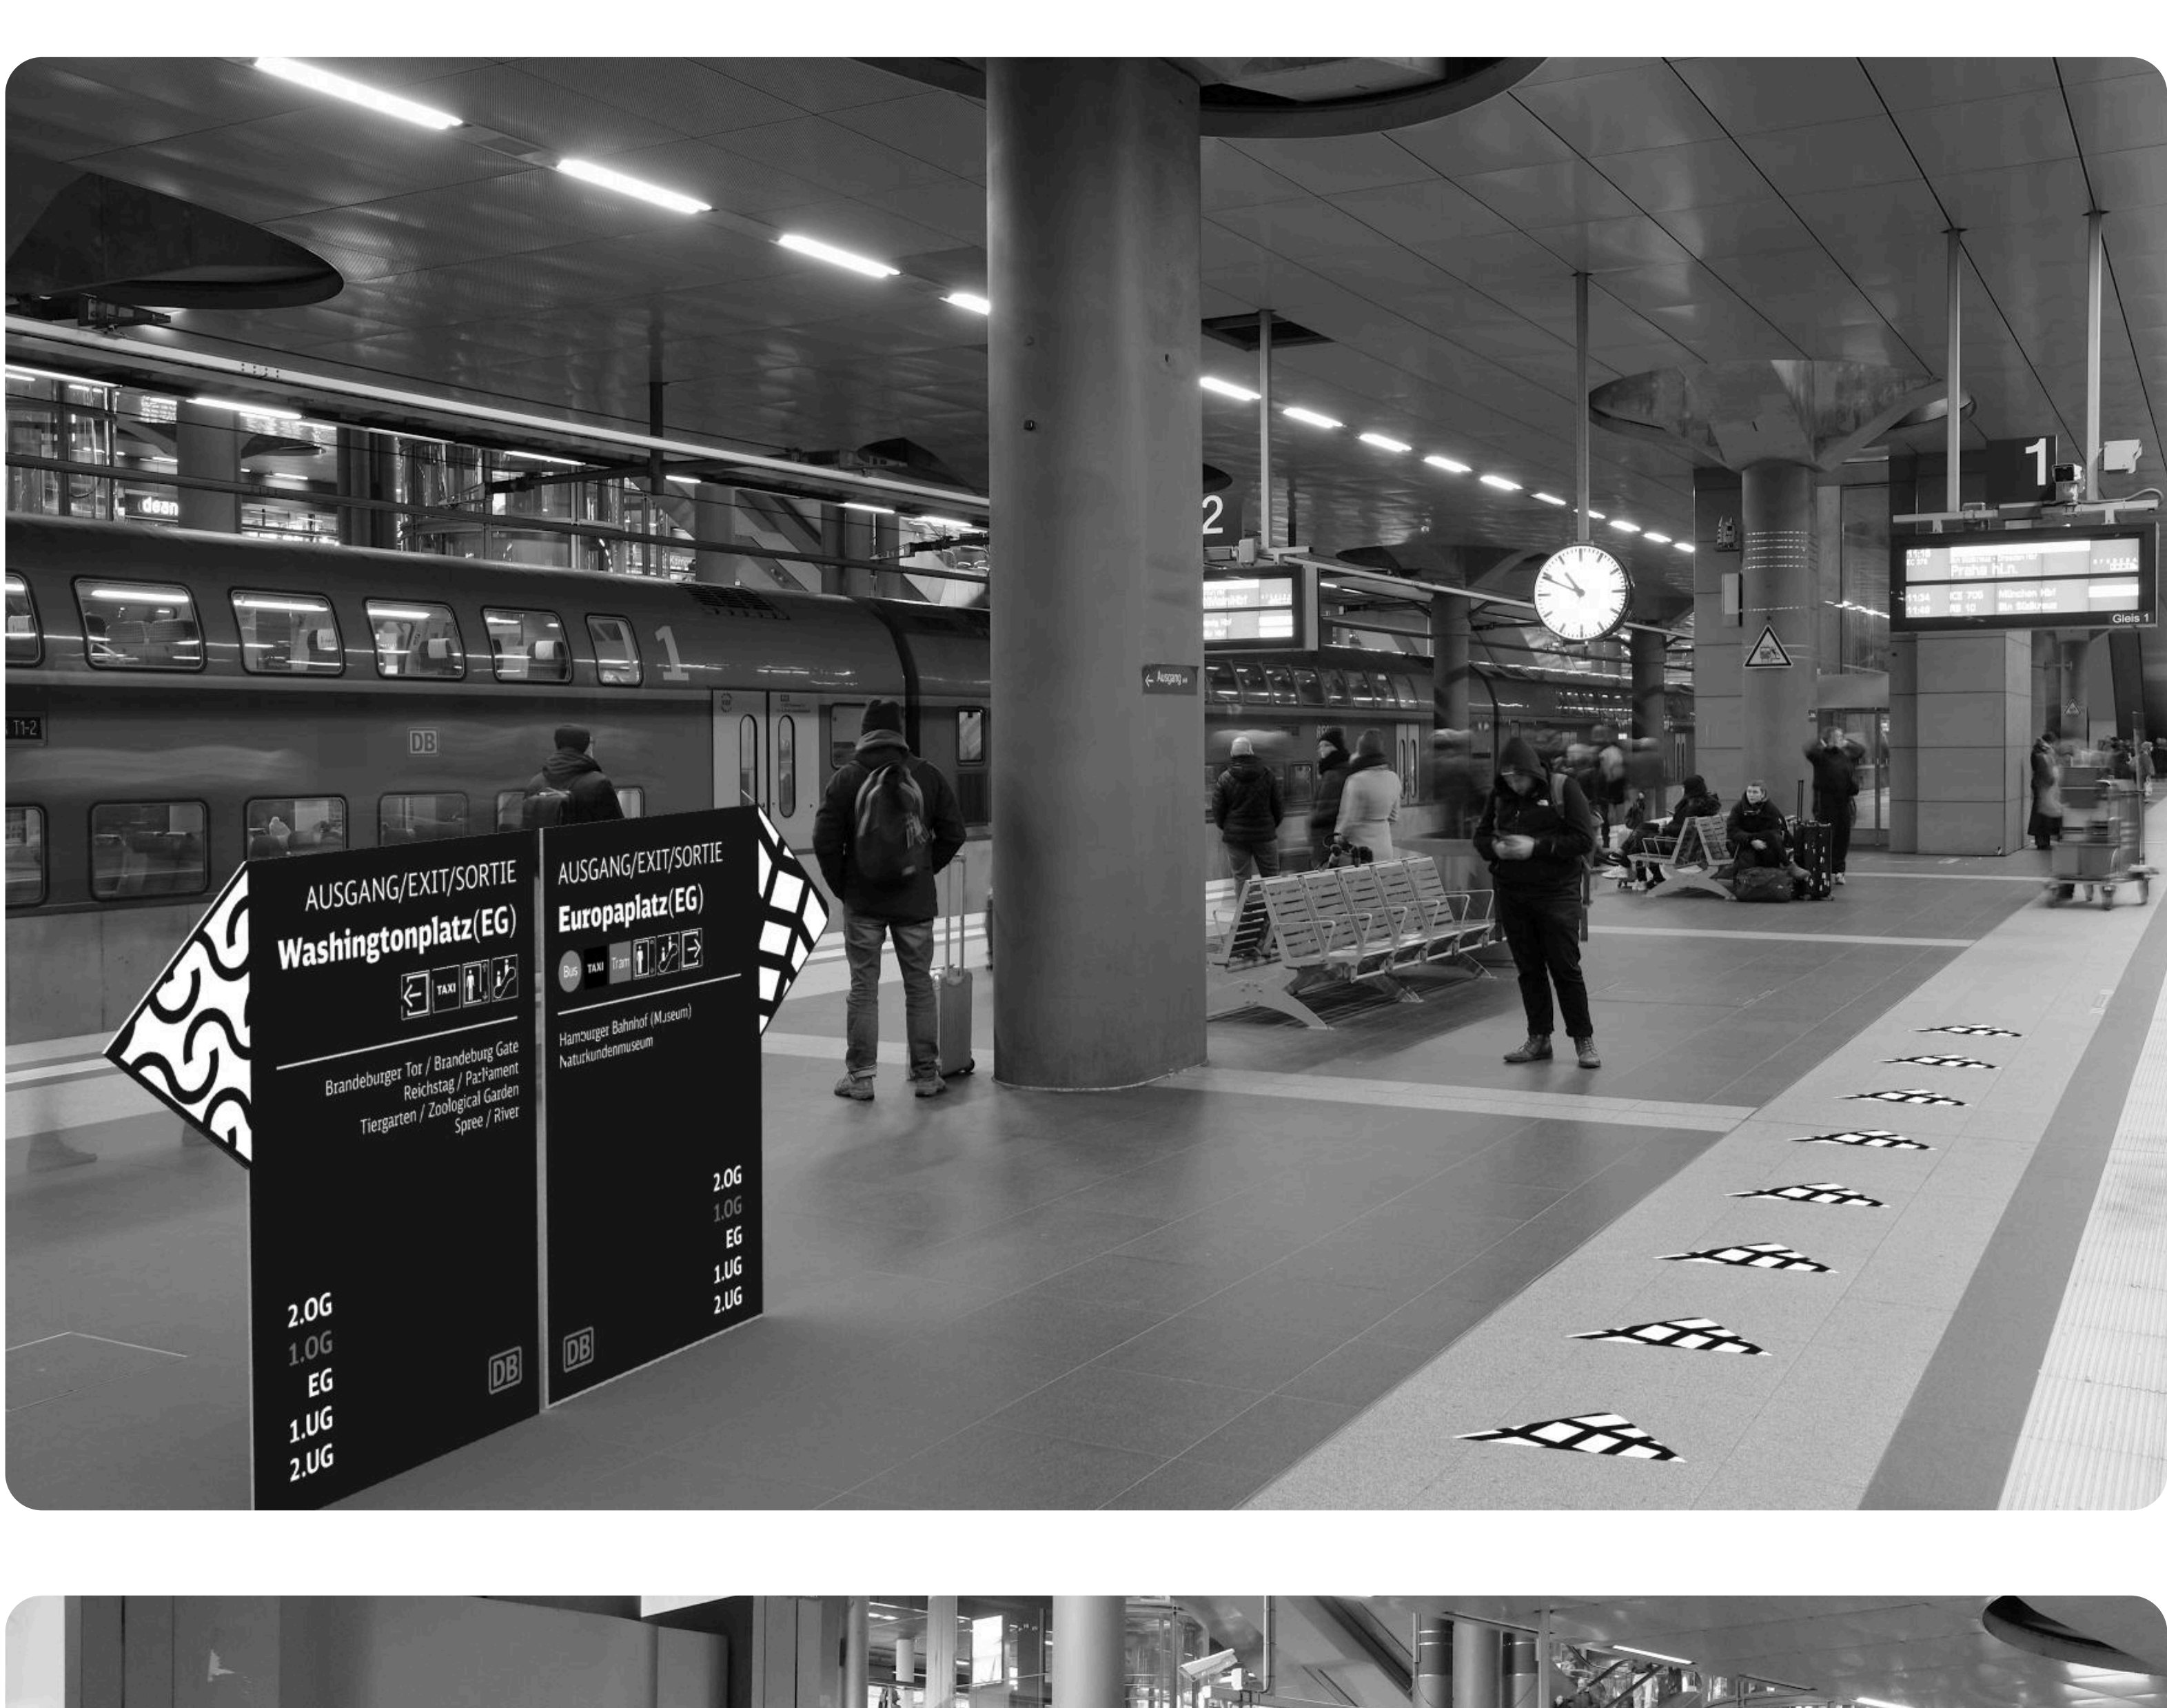

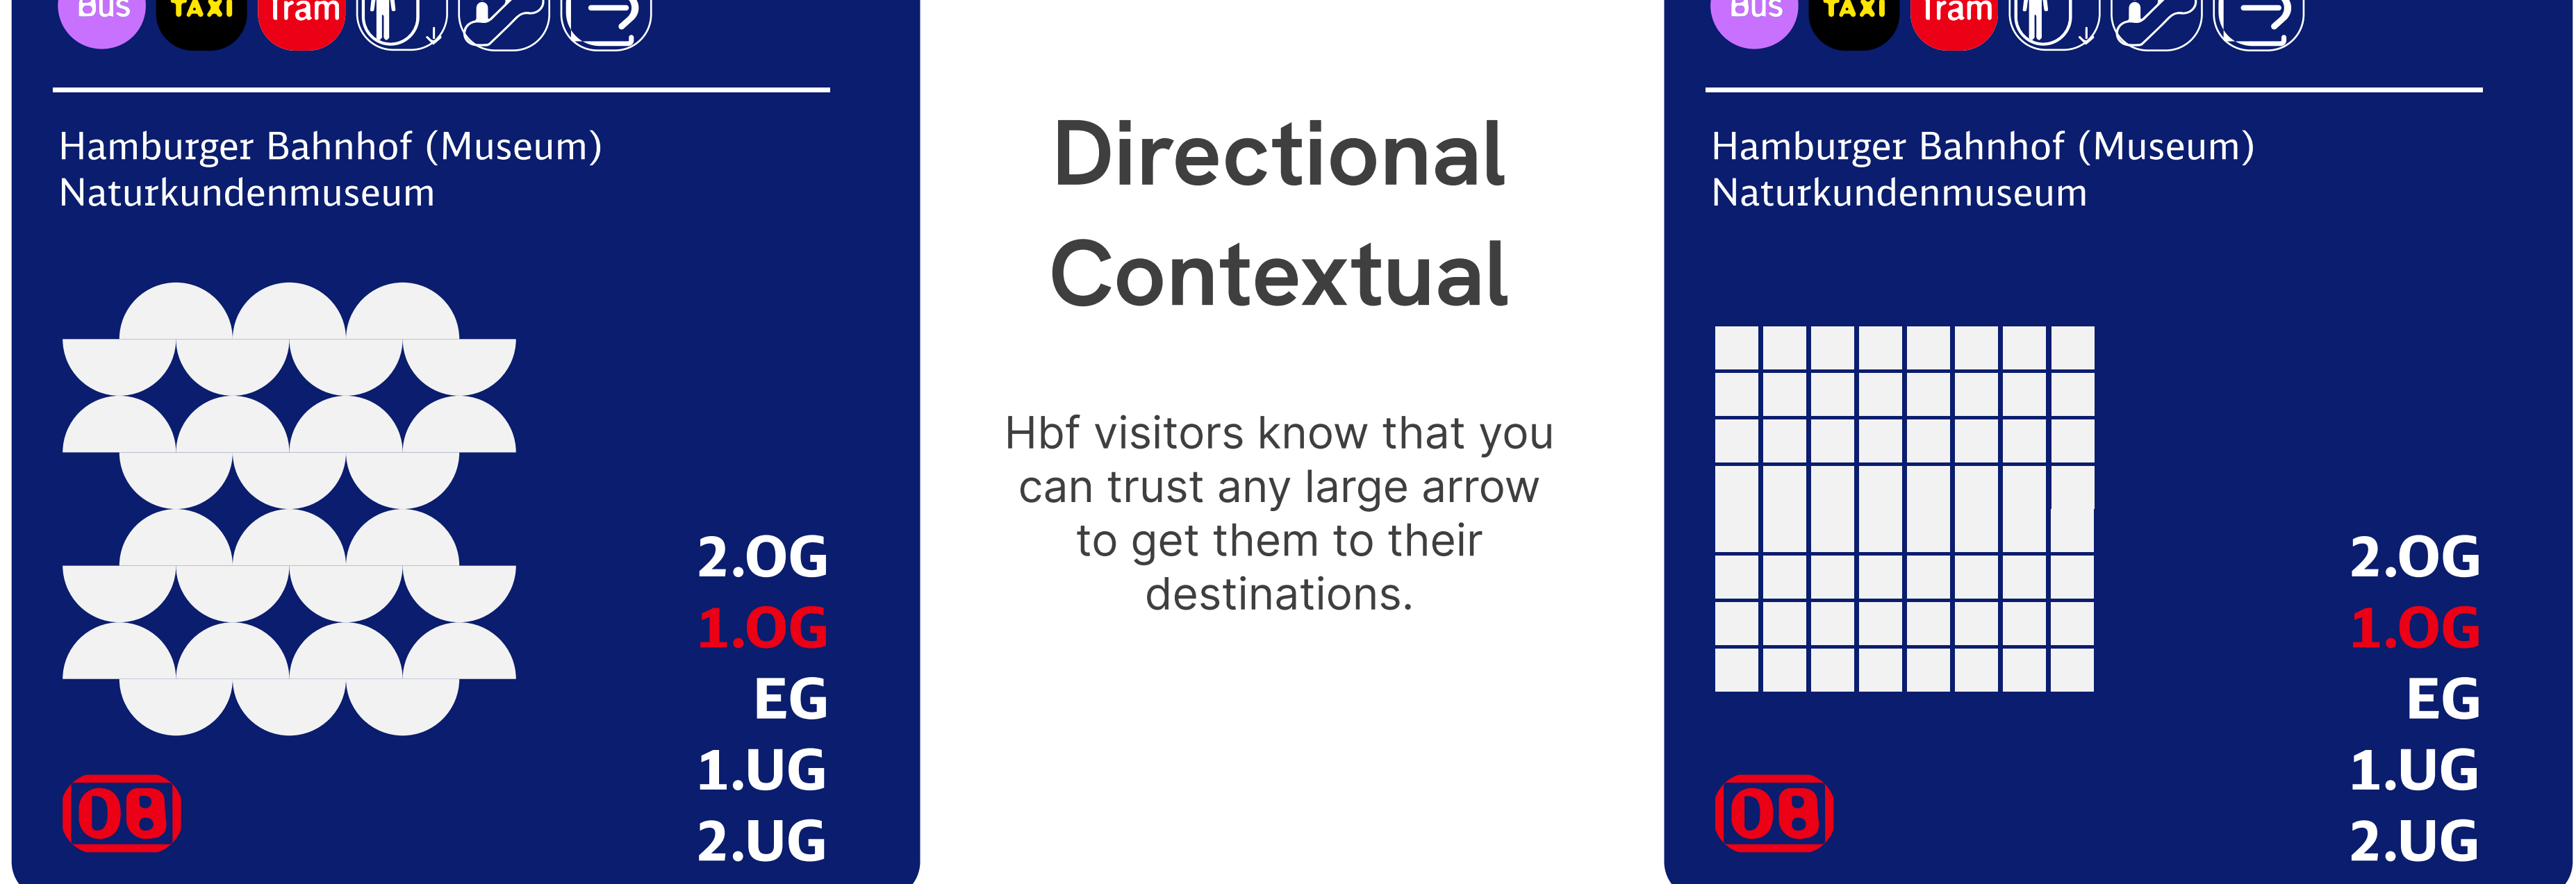

topiary is a berlin-based studio and workshop specializing in furniture and accessories design. Operating only locally, but looking to expand and carve an online presence for their newly crafted furniture and lighting collection.

This is not an exit:  
Wayfinding at Hauptbahnhof

Ironhack  
UX/UI  
Wayfinding

As part of our final project for the Ironhack UX/UI Bootcamp, we were tasked by Deutsche Bahn to come up with new ways to designate the exits at Berlin Main Central Station.

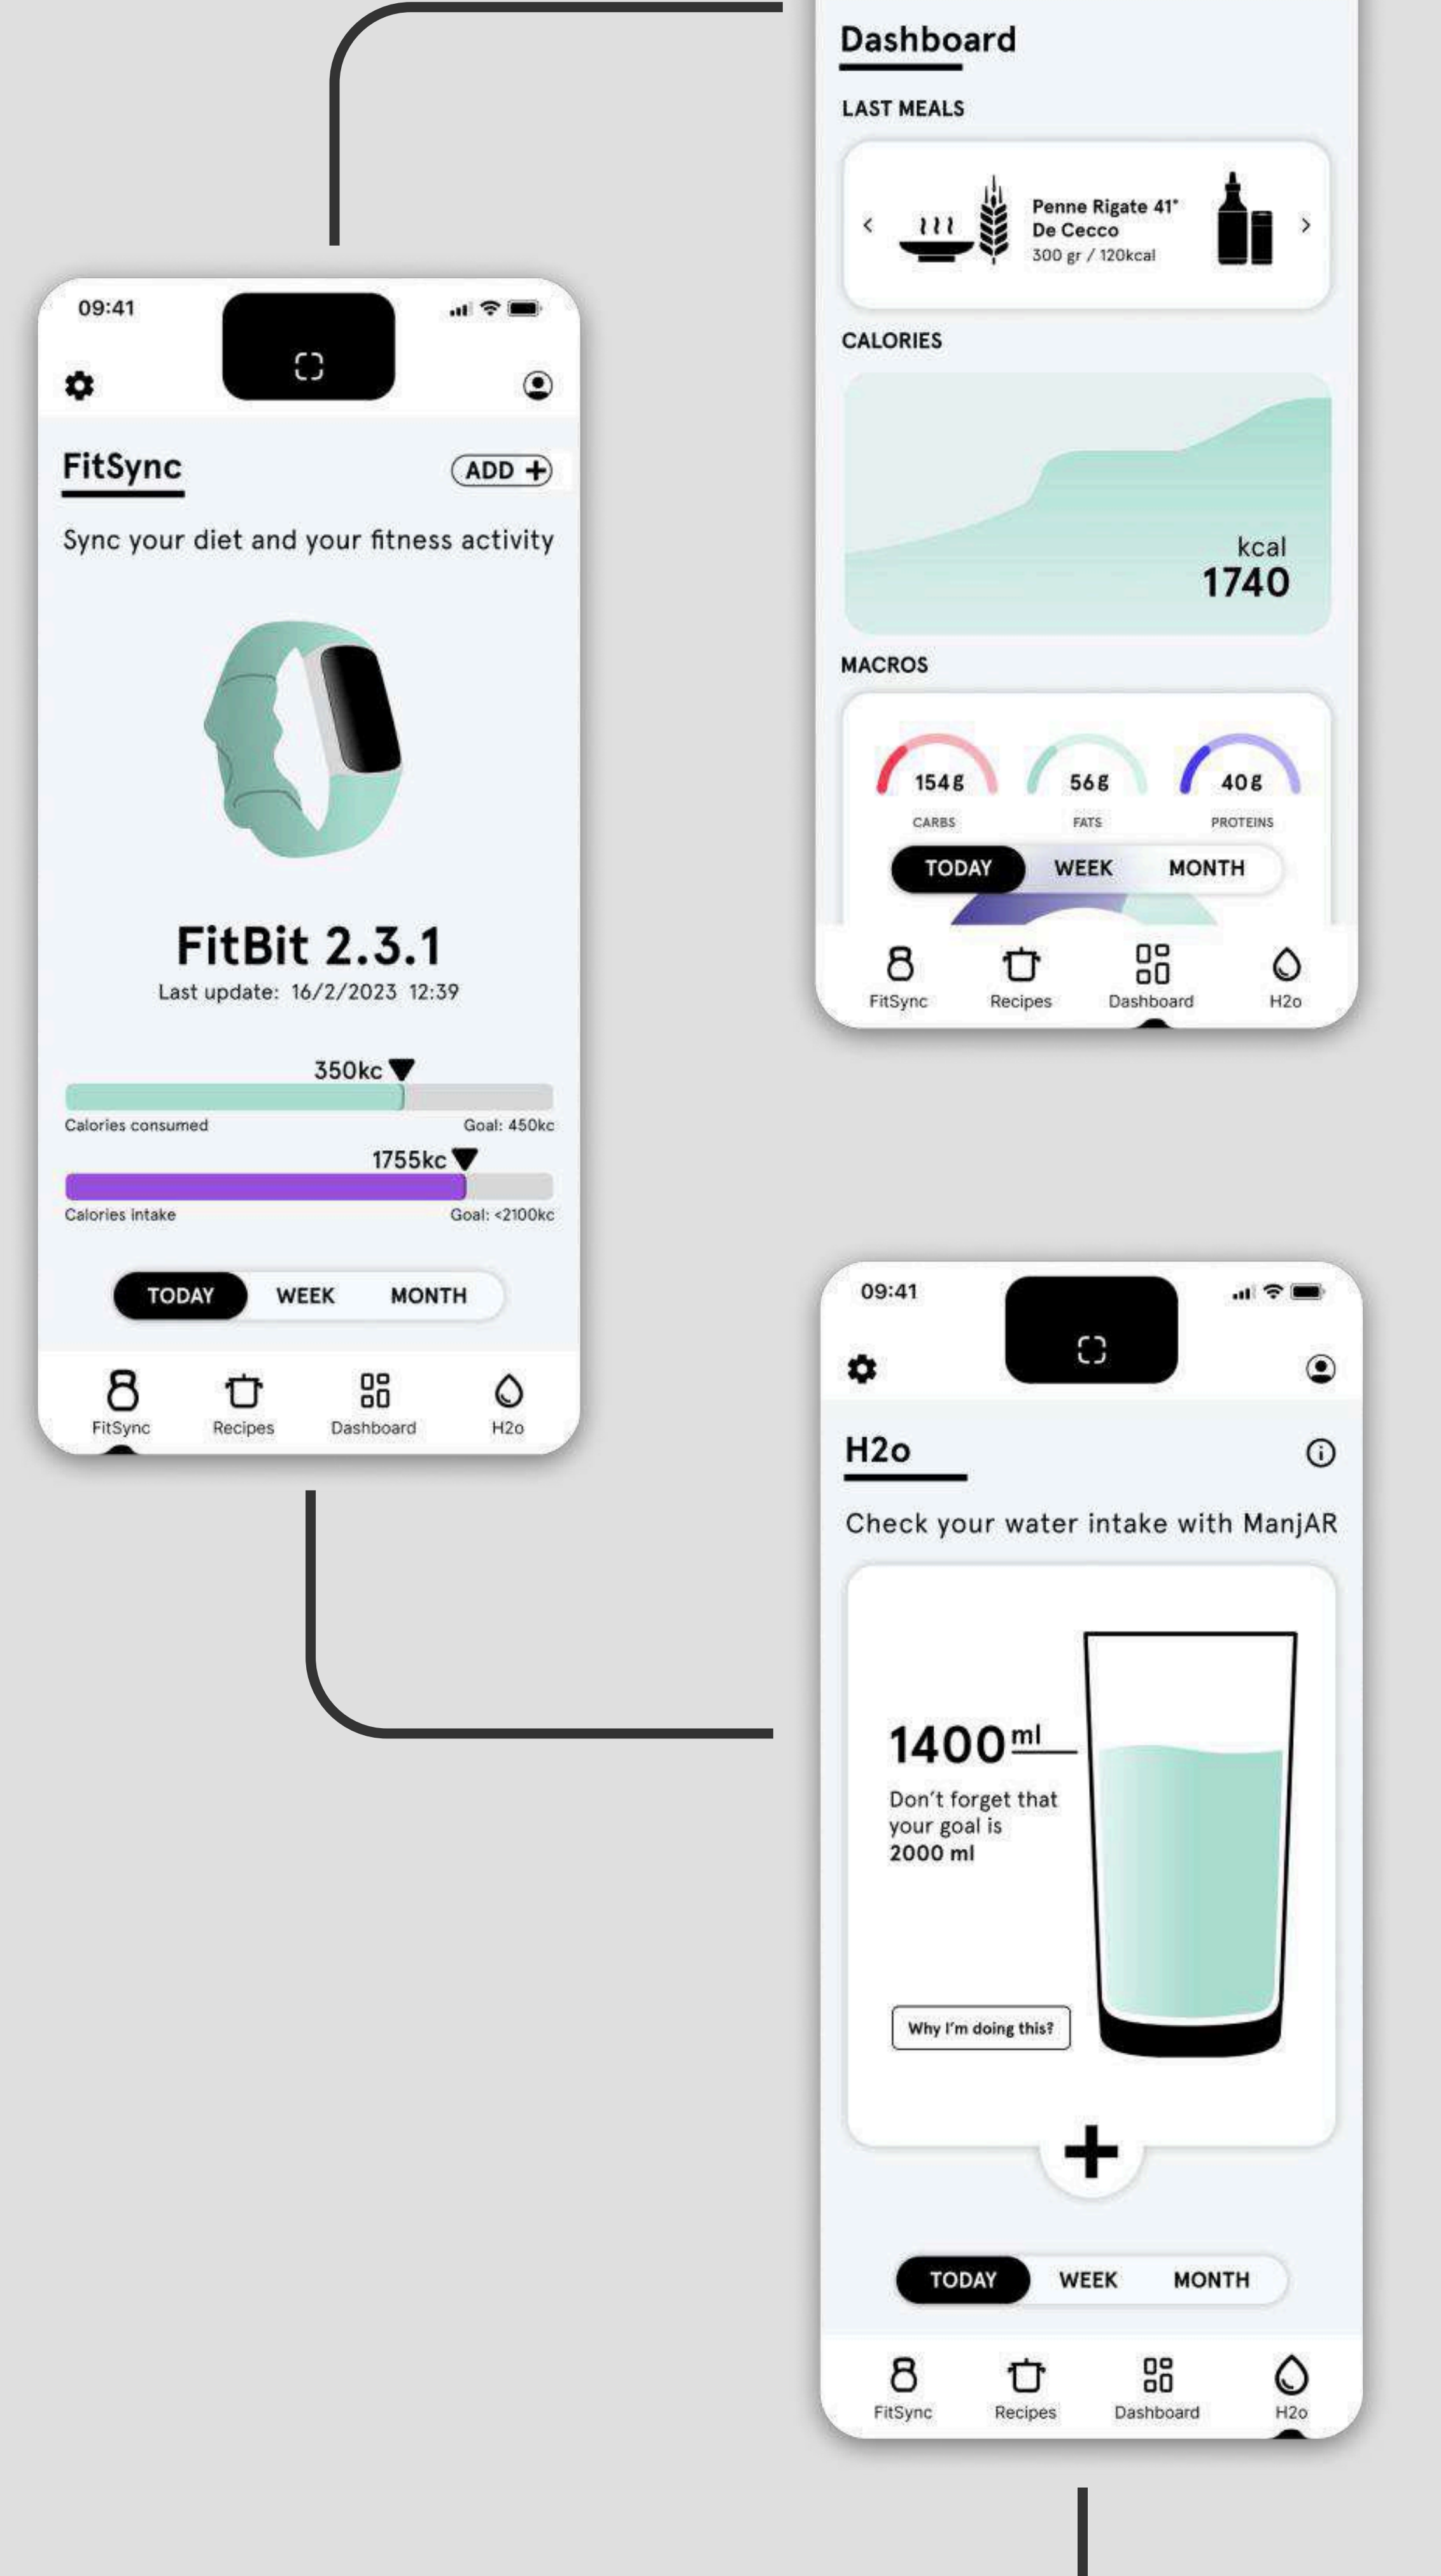

Manjar: A case for an augmented  
reality food journaling App

Ironhack  
UX/UI  
App

A peer and I designed Manjar, a healthy meal tracking app with AR to enhance user experience. Interviewing users, we found existing journaling apps lack good UX and that AR awareness is minimal, but users would use a food journaling app if it was easier.

We realized our brand with four key attributes in mind: lively, healthy, clean, and disruptive.

Manjar also features a grocery mode where users can input products and look up recipes. Manjar's capacity to advise customers on healthy diet meals as well as alert them about probable allergies or intolerances is another crucial feature.
